

What is emon?

- An energy monitoring & analysis solution developed by RMS.lu.
- Uses wireless and batterie-free devices that are already in use in some of the biggest and most modern buildings in the world.
- A cloud-based service, available from anywhere & anytime.
- Support all common browsers and devices.
- Provides a comprehensive and educationally valuable data representation.
- A helpful tool to save energy, measure air quality, analyse user-behaviour and optimize your operating costs.

No Wires.

No Batteries.

No Limits.

enocean® alliance

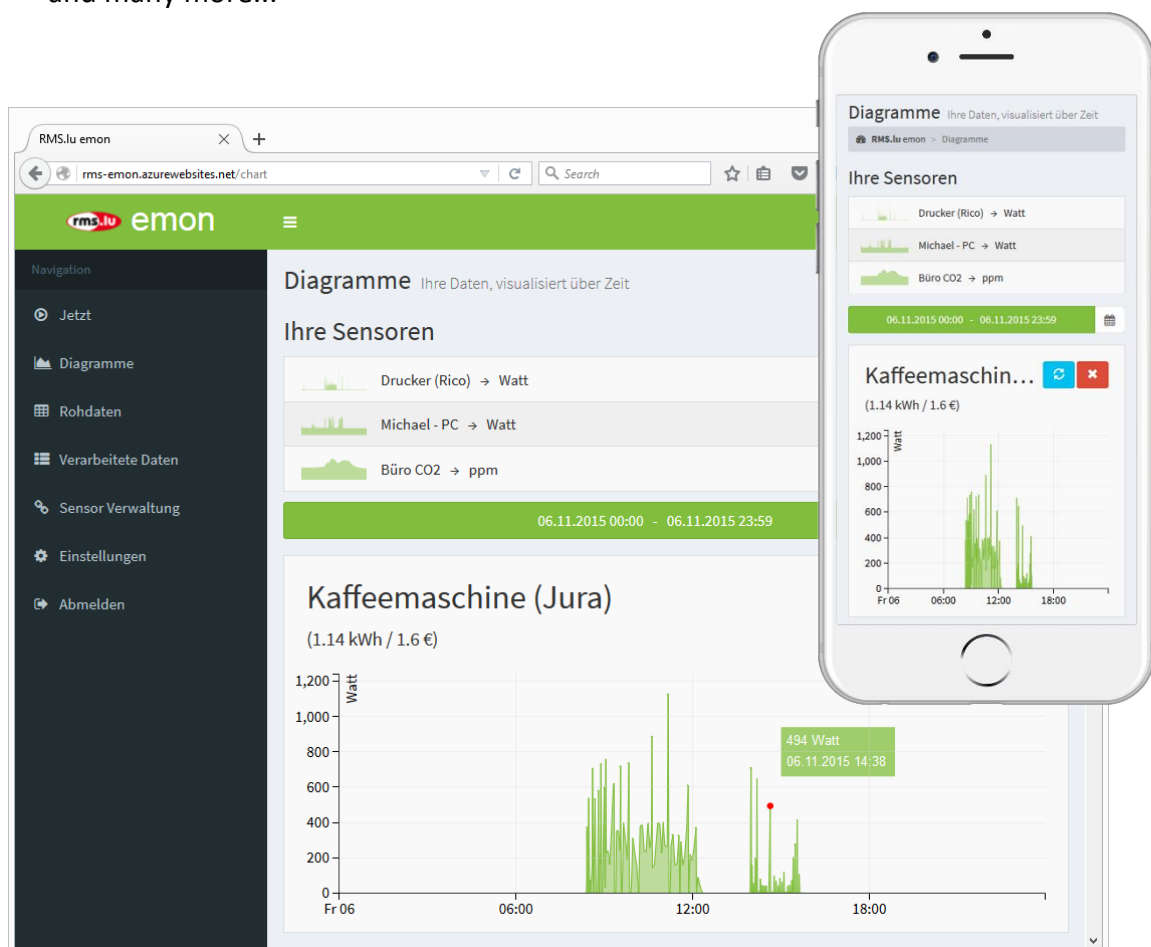

No Wires. No Batteries. No Limits.

Advantages

- Easy Setup → Plug & Play
- An unlimited amount of simultaneous measurements
- System works independently of existing networks
